ABOUT ME

As a Computer Science graduate, I am genuinely excited by the prospect of leveraging technology to create real-world solutions. My academic background has given me a solid foundation in software engineering principles and algorithms, backed by hands-on development experience using Python, Java, and C++. What truly drives me is the process of problem-solving: tackling complex data challenges, designing clean code, and optimizing performance to deliver tangible results. I am looking to join a dynamic team where I can combine my strong analytical abilities with my dedication to teamwork to make a measurable impact.
